

KEY CHARACTERISTICS:

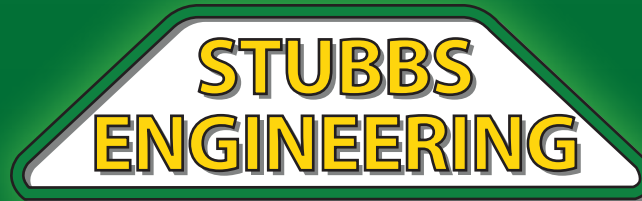

- High efficiency
- Low maintenance
- 4,800 litre capacity tank
- Simple operation
- Proven reliability
- Economical

Unlike most spray units, 'The Anderssen' uses high air volume and low spray pressure reducing atomization and allowing better distribution.

These high quality crop sprayers are now available through

INTRODUCING

*The
Anderssen*

AIR BLAST CROP SPRAYER

now being manufactured by
Stubbs Engineering

PHONE 07 4153 4743

www.stubbsengineering.com.au

FEATURES:

- Tree crops up to five metres high and down to ground level can be serviced by 'The Anderssen'
- Up to 60 spray nozzles can be used in any combination to maximise coverage and minimise waste

DURABLE FINISH:

- Main chassis sandblasted and two pack painted
- Stainless steel fan housing, air ducting and distribution tower
- Other components hot dipped galvanised
- Many years of productive use with low operating costs can be expected from this machine

MAINTENANCE:

- Specialists are not required for maintenance as the uncomplicated design and standard components used in 'The Anderssen' allow persons with basic mechanical knowledge to maintain this machine
